

Cover wide open spaces.

Turf farms, dairy farms, and pastures all have one thing in common. It takes expensive seed to keep them going. Our 10' seeder offers many option choices to fit the job you need. And our precise metering cup helps get the most from your seed investment.

Built rugged to take the beating of rough ground, yet sensitive enough for flat sod ground. The commitment you've made to your ground is huge. Let a Land Pride seeder play an important role in protecting your investment. Get the most out of your seed by planting it with a Land Pride seeder.

Primary seedbox is balanced between the front and rear rollers, eliminating bulldozing in light soils. The optional 4 bushel small seeds box will allow a 10%-20% rate of second seed with both boxes emptying at the same time.

Tongue can be easily removed for 3-point application.

PS25 SERIES

Cat. 2 or Pull-type — 10' 30 Bushel

- Cat. 2 or Pull-Type with front or end-mounted wheels
- Front mounted wheels reduce width by 3'
- 10' Seeding width
- 30 Bushel capacity
- Adjustable seed openings for small or fluffy seeds
- Non-corrosive, easy to calibrate seed cups
- Seed level indicator in full view from tractor
- All welded weatherproof seedbox
- Leakproof, lockup lid
- Lift hooks for easy loading on trailers
- Transport locks guard against cylinder failure during transport (Pull-type model)
- Vacuum sealed acremeter
- Implement rib tires: 9.5L x 15" x 8 ply
- #40 Chain with adjustable idler
- Cast iron packing wheels - front and rear
- Optional 4 bushel small seeds box
- Optional tire track removers
- Optional walkboard is convenient for filling the tall 30 bushel box

The optional walkboard allows for safe and spacious access to the seedboxes.

The rear packers split the rows made by the front packers, increasing the number of notches that push air bubbles out and seed in.

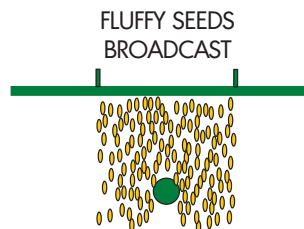

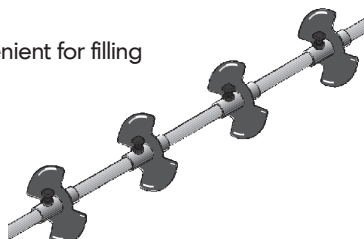

Seed level indicator is in full view from the tractor seat.

Cast wheels and optional spacers assure excellent seed-to-soil contact.

The optional agitator attachment can be used with fluffy seeds to prevent bridging.

Adjustable seed openings to handle fluffy or small seeds.
