

STP15

Features	Benefits
Universal quick attach mount	Fits a wide range of tractors and skid steers. Easy to hook-up and unhook.
Heavy square tube frame	3 1/2" Lower and 3" upper main frame tubes provide good strength.
Rectangular tube supports	Stronger than sheet steel gussets most competitors use.
2 1/2" Main pivot pin	Large diameter pin handles heavy working conditions.
Large jaw opening	Can pull trees up to 10" in diameter.
Greasable pivot points	All pivot points are greasable to reduce wear.
Cylinder shield standard	Heavy duty shield protects cylinder and fittings.
Angled jaw tips.	For digging roots and loosening soil around the base of trees.
Anti-slip access points	Prevents slipping while entering skid steer.
Supplied with Quick Disconnect couplers	Many competitors do not supply couplers.
