

BG/BGE2400 SERIES BALE GRABBERS

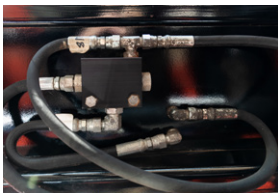

MATERIAL HANDLING

Move and stack round bales with ease.

Moving round bales is made more efficient with the Land Pride BG2400 and BGE2400 Bale Grabber. This Bale Grabber allows customers to move and stack round bales up to 2,400 lbs without damaging the wrap, and the standard back stop prevents material from intruding into the operator zone. The BG2400 is available with a universal quick-attach hitch or the BGE2400 is available with a euro mounting plate for use on both Skid Steers and Tractors. Each arm is controlled with a 3" x 16" x 1-1/2" welded cylinder.

An optional counter balance valve maintains even, constant pressure and prevents hydraulic bleed-off.

Round tubing prevents wrapped bale damage.

Standard backstop prevents material intruding into operator zone.

Available with Universal Quick-Attach or Euro hitch.

	BG2400	BGE2400
Hitch	Universal Quick-Attach	Euro
Weight - lbs (kg) without options	585 (265)	605 (274)
