

Quickly turn limbs into mulch or to aid in decomposition.

WC1503

Land owners can utilize Land Pride's WC1503 3-point mounted Wood Chipper to quickly turn mountains of limbs into chips for mulch or just to aid in decomposition. Driven by the tractor's PTO, this unit features a self-feeding 3" cutting capacity, two reversible and replaceable hardened-steel knives, adjustable discharge chute, and dual B-section drive belts.

The WC1504 features a self feeding 4" cutting capacity, 4 reversible and replaceable hardened steel knives and adjustable discharge chute. The WC1504 features direct drive to the rotor. Both models offer adjustable support stands to better match your tractor.

Adjustable support stands help elevate the Wood Chipper to match the height to your tractor's output shaft, enabling the driveline to remain straight and level.

Adjustable discharge spout rotates 270 degrees.
